Permission to Apply Lotions, Ointments, and Powders

As parent or guardian of _____, I give **Turner & Kauper Child Care** permission to apply the following selected protective or medicinal materials.

➤➤ **Please initial the boxes you agree to. All parents and guardians must sign at the bottom.**

Sunscreen as needed, applied liberally, for outdoor play, field trips, and especially for swimming or canoeing. We use sunscreen often, but *not* 100% of the time.

Insect repellent, applied sparingly, only when necessary. We use a moderate strength repellent, such as *Off Skintastic*[®]. We often apply more repellent to clothing than to skin. We use insect repellent rarely, but we prefer to have permission to use it when needed.

Diapering powder, such as talc, talc with zinc oxide, for comfort, and to prevent or treat diaper rash. We use diaper powder often; the babies and toddlers like it. If you have special preferences in diaper powder, specify _____

Diapering ointment, such as zinc oxide, **A&D**[®], or petroleum jelly to prevent or treat diaper rash. We apply ointment occasionally.

Antiseptic cream or ointment, such as **Bacitracin**[®], for minor cuts and abrasions, to prevent infection, and to sooth or ease pain. Also, hand sanitizer, to control spread of germs.

Topical analgesic, such as **Skeeter Stick**[®], to ease pain or itching from an insect sting or bite.

Petroleum jelly, skin cream and hand cream, to prevent and treat dry skin on hands and face.
